IMPORTANT NOTICE

RE: ANNUAL PALM TREE TRIMMING

June 14, 2021

Dear Unit Owners,

Nettles Island Association has once again contracted with Lawn Landscaping by 707, Inc (707) to perform the annual pruning of all Cabbage Palms in the common areas- including the Cabbage palms on the front of each lot owners' lot by the trash can. This work is scheduled to begin in the next couple weeks- weather permitting. Wayne, with 707, will have a crew available, upon completion of the Association's project, to assist individual lot owners with their pruning needs, should the lot owners choose. For individual lot owner's, 707's cost per palm for pruning will be approximately \$16-as long as the subject palm(s) has/have been pruned within the past year; if a palm is located in the rear of the lot and access is difficult, or if there are other circumstances which would cause more labor-intensive service, then, per Wayne, the cost may be a little higher. You may make your own arrangements with 707 by calling Wayne at: 772-335-9274.
